Foreign Agricultural Trade of the United States

July/August 1987

Library
22-00-000

IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION

* Foreign Agricultural Trade of the United States is published six times a
* year with two supplements. Subscription prices are \$21 a year domestic
* and \$26.25 foreign (prices subject to change). Send check or money order
* payable to "Superintendent of Documents" to Superintendent of Documents,
* U.S. Government Printing Office, Washington, DC 20402. For faster
* service, call (202) 783-3238 and charge your subscription to your VISA,
* MasterCard, or GPO Deposit Account.

IS IT TIME TO RENEW?

* Your subscription to this publication may be due to expire soon. If so,
* you will get a renewal notice in the mail from GPO about 90 days ahead of
* time. Only one notice is sent. You must return it promptly to ensure
* uninterrupted service.

DIGEST

U.S. Agricultural Exports Higher (see p. 2). U.S. agricultural exports rose to \$21 billion in the first 9 months of fiscal year (FY) 1987, 1 percent more than those of the same period in FY 1986. Volume for the October 1986–June 1987 period grew 12 percent to 95.5 million tons. Value rose for the first time since 1984 as the seasonal pattern of coarse grain shipments shifted and high-value exports benefited from favorable exchange rates.

October–June Imports Below Previous Year (see p. 71). U.S. agricultural imports totaled \$15.8 billion during the first 9 months of FY 1987, slightly below the record-high level for the same period in FY 1986. Competitive imports maintained a record pace during the period, while noncompetitive imports fell 11 percent, due primarily to lower coffee imports.

Commodity Prices Up Slightly in 1987 (see p. 117). Prices for soybeans, soybean meal, wheat, cotton, cocoa, and rubber increased during 1987, and by June surpassed year-earlier levels. Speculation and weather conditions caused some price increases. Factors such as the weakening of the dollar on foreign exchange markets and increased world demand also played a role.

CCC Export Credit Program Shipments Drop (see p. 121). In FY 1986, shipments of U.S. agricultural products through the Commodity Credit Corporation's (CCC) export credit programs fell to \$2.4 billion, 14 percent below year-earlier levels. Virtually all of these products were shipped under the Export Credit Guarantee Program (GSM-102), but some exports were shipped under the new Intermediate Export Credit Guarantee Program (GSM-103), which features longer credit terms.

Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators were Thomas A. Warden and Mary L. Fant. Denise Morton and Shirley E. Brown provided word processing and table formatting support. Editorial support was provided by Teri L. Davis, Research Information Branch, Economics Management Staff. Data processing support was provided by Sharlan Starr and William Meiller, International Economics Systems Branch, Data Services Center.

U.S. AGRICULTURAL EXPORTS HIGHER

U.S. agricultural exports rose to \$21 billion in the first 9 months of fiscal year (FY) 1987, 1 percent more than those of the same period in FY 1986. Volume for the October 1986-June 1987 period grew 12 percent to 95.5 million tons. Value rose for the first time since 1984 as the seasonal pattern of coarse grain shipments shifted and high-value exports benefited from favorable exchange rates.

Nontraditional and high-value exports accounted for most of the value increase, while grain exports accounted for most of the volume increase. The lower value of the dollar boosted high-value exports by reducing costs for foreign consumers, while increased world demand and lower prices under new U.S. farm programs spurred bulk exports. Export value in the first 9 months of FY 1985 and FY 1986 fell 14 percent and 18 percent from year-earlier levels, largely because of lower bulk export prices and volume. Although exports rose in the first 9 months of FY 1987, neither value nor volume completely rebounded from the losses sustained in the previous year. Compared with the 1985 level, value dropped \$4.5 billion and volume lagged 7.8 million tons.

Unusual Seasonal Export Pattern in 1987

FY 1987 has differed from recent years in not only its export increase but also in its seasonal distribution of exports. Export value typically declines substantially between winter and summer. In 1982-86, values in May and June averaged 16 percent and 22 percent lower than in January. In 1987, values in May and June fell 3 and 4 percent.

Coarse grain exports accounted for virtually all of the adjustment in seasonal patterns (see figure 1). A slow export pace during the first half of the year meant a year-to-year decline in cumulative export volume as of March. But, by June, volume of U.S. coarse grain exports exceeded those of the first 9 months of FY 1986 by 6 million tons, or 20 percent. U.S. coarse grain exports went from a 2.7-million-ton cumulative decline in March 1987 to a 6-million-ton gain in June as sales to the USSR, Japan, Korea, Mexico, and Taiwan rose. Exports to the USSR and Japan during those 3 months exceeded year-earlier levels by 3.1 million tons and 1.9 million tons.

This seasonal shift has several possible causes. The USSR's last grain crop jumped 10 percent to 210 million tons, its best in nearly a decade. With such a large crop, the Soviet need for imports in 1986-87 seemed low early in the season. However, following a dry autumn and harsh winter, prospects for the next crop dimmed, possibly increasing Soviet interest in outside supplies. Argentina's crop prospects also deteriorated during the winter, and China's exports began falling off as consumption expanded faster than production.

Lower production in Australia and Thailand and a U.S. Export Enhancement Program (EEP) bonus for barley to Saudi Arabia also boosted U.S. coarse grain exports in the first 9 months of FY 1987. Increased barley exports raised U.S. coarse grain exports to Saudi Arabia 2 million tons. Coarse grain exports to Other East Asia rose 2.2 million tons and to Mexico, 1.2 million tons. In addition, China took 1 million tons of U.S. corn. China was last a major customer for U.S. corn in FY 1983 and became an important

competitor in 1985. Economic reforms in China boosted grain production in 1978–85, but after 1985, production gains slowed while consumption continued to grow.

Wheat Export Volume Rises

Volume of U.S. wheat exports rose from 16.8 million tons to 17.6 million tons in October–June of FY 1987. Wheat exports grew as the EEP and lower loan rates increased U.S. competitiveness. New U.S. programs, combined with stiff competition, helped cut the average export price of U.S. wheat more than 20 percent. By the end of June, FY 1987 exports exceeded year–earlier shipments by nearly 1 million tons, and unshipped purchases were 3 million tons higher. U.S. exports to the USSR rose 600,000 tons; to Tunisia, 550,000 tons; to China, 120,000 tons; to Poland, 420,000 tons; and to Yugoslavia, 300,000 tons.

Exports to the European Community (EC) fell 350,000 tons. Portugal's EC membership reoriented its trade from non-EC suppliers, while increased use of wheat gluten elsewhere in the EC reduced the need to import high–protein wheat to improve the milling characteristics of locally produced wheat. Increased production in Pakistan cut U.S. exports there by more than 800,000 tons.

Increased exports of coarse grain and wheat helped raise volume of U.S. grain and feed exports about 9 million tons, but value for these exports continued to fall in FY 1987. U.S. grain and feed exports fell \$784 million to \$6.5 billion. Wheat exports fell \$450 million and corn exports fell \$620 million as lower prices offset value gains. On the other hand, barley, sorghum, and non–oilcake feeds and fodders (mostly corn gluten) gained sufficient volume to compensate for lower prices. Prices for these three products fell less than corn and wheat prices, and, paradoxically, they also achieved proportionally larger increases in export volume.

Cotton Exports Up More Than 100 Percent

Volume of U.S. cotton exports in the first 9 months of FY 1987 rose more than 700,000 tons, a 200–percent increase over year–earlier levels, as U.S. export prices fell nearly 30 percent and the U.S. share of world markets rebounded. Value rose nearly \$580 million, a 112–percent increase from FY 1986. In August 1986, the United States implemented a marketing loan program for cotton, cutting U.S. prices 59 percent that month. U.S. exports slowed markedly before August as world prices fell below U.S. prices in anticipation of the impending U.S. cut. The U.S. share of world cotton trade fell to 10 percent from 30 percent as every major U.S. customer turned elsewhere.

The marketing loan program linked U.S. prices to world prices, restoring competitiveness and increasing exports to every major customer. U.S. cotton exports to Western Europe rose to 190,000 tons from 71,000 tons, and those to Japan rose to 240,000 tons from 97,000 tons. Exports to Southeast Asia and Other East Asia also increased sharply. However, only in Southeast and Other East Asia did U.S. cotton exports rise compared with those of 1985. Although exports to Western Europe and Japan increased compared with those of 1986, they fell short of 1985 shipments by 87,000 tons. Cotton exports to Southeast and Other East Asia exceeded 1985 shipments by more than 47,000 tons.

U.S. cotton exports in the first 9 months of FY 1987 dropped 86,000 tons and were \$600 million lower from those of the same period in 1985. Total U.S. agricultural exports

similarly fell 7.8 million tons and \$4.5 billion. Many agricultural exports only partially rebounded in the first 9 months of FY 1987, with either prices or volume shipped in 1987 still low compared with those of 1985. Grain and feed exports fell in both price and volume, while exports of oilseeds and products lost value as falling prices offset higher volume. Bulk products generally failed to completely recover in the first 9 months. Exports of high-value products, on the other hand, continued growing, outperforming those of both 1986 and 1985.

High-Value Products Continue Growing

U.S. exports of animal products rose 15 percent in the first 9 months of FY 1987 to \$3.7 billion, and exports of horticultural products rose 19 percent to \$2.7 billion. Stronger sales to developed countries accounted for 80 percent of the increased export value of these and other high-value products. Sales opportunities in Japan and Europe improved from 2 years of favorable exchange rates and a significantly faster expansion of domestic demand in developed markets overseas compared with that of the United States. U.S. bulk product exports depended more heavily on sales to centrally planned and less-developed countries where exchange rates and growth were less encouraging to trade. (*Stephen MacDonald, Commodity and Trade Analysis Branch*)

OCTOBER-JUNE IMPORTS BELOW PREVIOUS YEAR

U.S. agricultural imports totaled \$15.8 billion during the first 9 months of fiscal year (FY) 1987 (October 1986-June 1987), slightly below the record-high level for the same period in FY 1986. The import estimate for FY 1987 is \$20.5 billion, 2 percent below year-earlier levels when a record-high \$20.9 billion was imported. The summer months are normally slower for imports.

Noncompetitive Imports Down 11 Percent

During the first 9 months of FY 1987, noncompetitive imports at \$5.3 billion fell 11 percent below the first 9 months of FY 1986. Coffee imports reached 900,000 tons as, for the first time in more than 10 years, coffee prices fell below \$1 per pound in mid-July. This price decrease resulted in a 25-percent drop in coffee import value. Of the top 10 suppliers of U.S. coffee, only Costa Rica increased its income from coffee sales. Brazil, Colombia, and Mexico, the top three suppliers of U.S. coffee, account for about 45 percent of U.S. supply. The International Coffee Organization (ICO) council expects to resolve the issue of export quotas, which were suspended in February 1986, at the ICO September 21st meeting.

The volume of cocoa and product imports from October 1986 to June 1987 was 6 percent above the volume for October 1985-June 1986, amidst troubles in the International Cocoa Organization (ICCO). Unlike the ICO, members of the ICCO disagree over the price at which ICCO releases cocoa stocks onto the world market. Also unlike the ICO, this conflict does not occur during a period of large surpluses. Cocoa prices during the first 9 months of FY 1987 fell an average of 12 percent from the first 9 months of FY 1986.

Imports of crude rubber continue at high levels for the fourth consecutive fiscal year. Through June, crude rubber imports were up 1 percent from year-earlier levels, while imported rubber prices were recovering from last fiscal year's low of 35 cents per pound.

Competitive Imports On Record Pace

FY 1987 imports of competitive products reached \$10.5 billion during October-June, 6 percent above the first 9 months of FY 1986. Meat imports are already at \$2 billion with both beef and pork up by more than 20 percent. Live cattle imports are up 32 percent through June of FY 1987 with shipments from Mexico at 1.2 million head, up 45 percent from those in FY 1986.

Fresh fruit imports were up 27 percent, mainly due to increased shipments of grapes from Chile, and melons and strawberries from Mexico. Malt beverage imports value increased 20 percent.

Forecast Accuracy

In 8 of the last 10 years, the May import forecast has been within 5 percent of the actual import level. In each of the last 5 fiscal years (FY 1982-FY 1986),

the May forecast has averaged 4 percent below the actual level. In fact, of the last 18 forecasts (May 1982–August 1986) that can be checked against actual fiscal year import levels, only 2 forecasts, August 1985 and February 1986, exceeded the actual import levels.

1/ Fiscal year is from October to September.

Table 11--U.S. agricultural imports: Forecast as a percentage of actual, November 1976–August 1986

Fiscal Year 1/	Nov.	Feb.	May	Aug.
	<u>Percentage of actual</u>			
1976-77	90	100	101	104
1977-78	101	101	101	102
1978-79	87	91	99	101
1979-80	101	104	108	101
1980-81	108	105	105	101
1981-82	110	103	97	95
1982-83	95	94	96	99
1983-84	90	90	93	95
1984-85	96	99	99	102
1985-86	96	100	96	98

1/ Fiscal year is from October to September.

The quarterly forecast exceeded the quarterly actual 17 of 20 times from February 1977 to February 1982. Since February 1982, the reverse has been true.

Seasonal Patterns

Many import commodities follow distinct seasonal shipping patterns for technical and economic reasons. In the case of sugar, the top 10 countries that received quotas account for approximately 70 percent of the total and ship on a regular schedule to avoid temporary surpluses and deficits. Fruit and vegetable imports are highest during the spring and winter when U.S. production is lowest. Feeder cattle mostly enter the United States from Mexico during November–January, while fed cattle do not follow a clearly defined seasonal pattern.

Total agricultural imports have shown significant seasonality. The following index shows the seasonality of imports since fiscal year (FY) 1975.

Seasonal factors for agricultural imports

<u>Monthly average = 100</u>			
October	96.1	April	104.9
November	95.2	May	103.4
December	101.1	June	99.7
January	108.0	July	95.5
February	98.6	August	93.3
March	109.2	September	95.0

The March index averaged 109, 9 percent above the monthly average, while September shipments average 5 percent below the monthly average. (*Stephen R. Milmoë, Commodity and Trade Analysis Branch*).

COMMODITY PRICES UP SLIGHTLY IN 1987

Prices for soybeans, soybean meal, wheat, cotton, cocoa, and rubber increased during 1987, and by June surpassed year-earlier levels. Speculation and weather conditions caused some price increases. Factors such as the weakening of the dollar on foreign exchange markets and increased world demand also played a role.

Weather played an important role in markets this year, when U.S. farmers planted the lowest acreage of principal U.S. crops since 1972. Sparse rainfall and record-high temperatures in U.S. crop areas during 1987 tended to raise prices until June, although higher prices were reversed late in June as favorable weather resumed. Export demand increased when the Soviet Union entered U.S. grain markets later than usual and bought more U.S. wheat than during the previous 2 years combined. Increased export demand and lower production decreased U.S. wheat stocks at the beginning of the crop year for the first time since 1983, which also helped prices.

Growing demand also steadily pushed cotton prices upward. Cotton use in the United States in April of 1987 was the highest in 13 years, and cotton consumption in May of 1987 reached a new high. Burgeoning consumption and an unexpected tightness in global supplies caused cotton prices to increase following the August 1986 implementation of a U.S. marketing loan program. In contrast, rice prices continuously dropped when faced with foreign competition.

Cocoa prices surged in June as dryness in Ghana, the Ivory Coast, and Brazil threatened harvests and International Cocoa Agreement (ICA) buffer stock purchases began. Coffee prices stabilized in May in anticipation of a restrictive Brazilian export policy that failed to materialize. Coffee prices remained steady through June as the Brazilian coffee crop passed its period of greatest vulnerability to weather.

Inflation Remains Slow

Anticipation of resurging inflation was widespread in 1987, though not universal. Weakening of the dollar on foreign exchange markets was expected to force import prices upward in the United States. Low commodity prices and strong exchange rates in Europe and Japan were expected to increase consumption there, and to raise prices in dollars. However, moderate U.S. wage growth and the steadying of both oil prices and the dollar in mid-1987 reduced concerns about inflation.

Import prices rose slowly in the United States as suppliers cut profits to preserve market share. In Europe and Japan, higher profit margins of importers and retailers absorbed reductions in import costs. As a result, consumers were shielded from the incentive to increase consumption. (*Stephen MacDonald, Commodity and Trade Analysis Branch*).

CCC EXPORT CREDIT PROGRAM SHIPMENTS DROP

During fiscal year (FY) 1986, shipments of U.S. agricultural commodities and products through the Commodity Credit Corporation's (CCC) export credit programs fell to \$2.4 billion, 14 percent below year-earlier levels. Virtually all of these commodities and products were shipped under the Export Credit Guarantee Program (GSM-102), which guarantees repayment of private credit extended for the export of specified agricultural commodities to specified countries. Under GSM-102, short-term credit of up to 3 years at prevailing interest rates is arranged through commercial banks or with the exporter.

A small amount of exports was authorized under the new Intermediate Export Credit Guarantee Program (GSM-103), which covers credit extended for between 3 and 10 years. Greater exports under GSM-103 are expected in FY 1987, as FY 1986 GSM-103 exports totaled about \$723,000 in breeding cattle shipped to Ecuador.

Overall, FY 1986 exports under the two programs constituted about 10 percent of total agricultural exports, the same share as in FY 1985.

Wheat, corn, and soybeans were the top commodities shipped under the GSM-102 program. Wheat continued to constitute the largest share of shipments (36 percent), but the FY 1986 value of wheat shipments dropped about 25 percent below its FY 1985 value of \$1.1 billion. Because total U.S. wheat export values declined, the proportion of wheat shipments under the credit guarantee program remained between 25-30 percent during FY 1985 and FY 1986. Corn was again the second largest commodity exported under the GSM-102 program. While FY 1986 GSM-102 corn exports of \$372 million dropped compared with FY 1985, overall corn exports dropped in greater proportion. Thus, the GSM-102 share rose to more than 10 percent of total exports. The value of soybean exports in FY 1986 rose substantially to \$227 million, and the GSM-102 share of soybean exports reached more than 5 percent.

Primary destinations of GSM-102 shipments changed slightly during FY 1986. Exports to Mexico under the GSM-102 program rose about \$400 million, which made Mexico the principal GSM-102 destination in FY 1986. Mexico was the sixth largest destination of GSM-102 exports in FY 1985. Exports to Mexico, Korea, Iraq, Egypt, and Portugal combined constituted about 75 percent of FY 1986 GSM-102 exports. In FY 1985, Korea, Brazil, Iraq, Portugal, and Egypt were leading markets. Exports to Brazil fell due to sharply reduced wheat purchases; Portugal reduced its GSM-102 purchases after joining the European Communities (EC). (*Thomas Warden, Mark Smith, and Fanny Lockley, Commodity and Trade Analysis Branch*).
